200	198	394	344	230 x 262	310
250	248	494	444	280 x 312	360
315	313	594	544	345 x 377	425

All dimensions in mm.

Application

The diffuser type DA360 is used for the supply of cooled or heated air in facilities such as offices, shopping centres and where simple adjusting of the air pattern is required without influencing air quantity or pressure loss.

The diffuser can be mounted in the ceiling and has an adjustable air pattern in 1, 2, 3 or 4 directions.

Adjusting possibilities:

4-way

3-way

2-way

2-way

1-way

Technical information

Characteristics :

- The perforated plate is mounted in the frame with hinges for access.
- Standard construction is a 4-way air pattern.
By changing the deflector plates, an air pattern in 3, 2 or 1 direction can be obtained.

Construction:

- diffuser: steel, painted white (RAL 9010)
- deflector plates : steel, painted black (RAL 9005)
- plenum : galvanised sheet steel

Specifications description

Example:

Square steel supply diffuser with clips lock and with 4 adjustable deflector plates and circular side entry spigot. The diffuser is painted white (RAL 9010)

Type: DA360S
size ... mm

Accessories

- **DT003:** Damper with several radial opposed segments. Adjustable through the diffuser after opening the hinged perforated plate. Construction out of sheet steel and painted black (RAL 9005).

Size	Ø N	H
