

WELDING PINS

WELDING PINS are, like the self adhesive pins (**PINSA**), suitable for fastening insulation blankets to square or rectangular air ducts. The pins can also be used for round and oval ducts.

CONSTRUCTION

The pins have been manufactured out of galvanized steel and provided with a soldering side at the end. Clamps can be delivered with the pins. After attaching the insulation blanket the clamps will be fastened to the pins. This will keep the blanket in the correct position. Protecting caps are recommended where projecting pins can injure people. For each square metre of insulation blanket 10 - 12 pins will be needed.

The soldering side will be activated with a pin welder. This pin welder enables to attach 6 - 8 pins per minute. Because the pin welder is provided with a timer it is no need to control the soldering time. The timer can be adjusted to the material of the duct system.

ORDERING INFORMATION.

It is possible to order protecting caps (**SP-CAP**) to the **WELDING PINS** and the clamps Other special clamps (**PINSACLIP-CL1**) can be ordered. The pin welder (**PW-33**) is also deliverable.

Ordering code	Length pins
SP-25	25 mm
SP-32	32 mm
SP-42	42 mm
SP-51	51 mm
SP-63	63 mm
SP-76	76 mm
SP-105	105 mm
CL-1	-
PINSACAP	-
PW-33	-
