THE MOBILE STEAM HUMIDIFIER FROM NORDMANN

This mobile humidifier is particularly suitable for Art Galleries, Antique Shops, Museums, Medical Centres, Laboratories, Office and Computer Rooms, Shops, Archives, Printing Shops etc., and in any situation where temporary humidification only is required, or where a fixed installation with mains water and drain water lines is not possible.

- steam capacity 2 kg/h
- sterile steam
- stainless steel casing
- built-in hygrostat
- simply to plug in socket
- fitted castors give ease of movement
- 10 litre water tank for approximately 5 hours of continuous operation

This electrode type steam humidifier does not need any permanent water supply or drain line. It is in fact a closed system and is therefore ideal for rooms where temporary humidification only is required, or where a fixed installation is either not desirable or possible. The *easyVap* is also suitable for larger domestic applications up to approximately 500 m<sup>3</sup> where the capacity of a domestic humidifier is insufficient.

The *easyVap* has an **elegant but robust stainless steel casing** and is fitted with a side handle and castors to ensure complete mobility with minimum effort.

The humidifier has a capacity of **2 kg of steam per hour** and a 10 litre water tank, to produce continuous steam at full capacity for approximately 5 hours. Set point humidity between 30 and 90 % R.H. can be set by means of the built-in hygrostat, which controls the humidifier automatically and distributes the steam into the space by means of the integrated blower unit. The humidifier is supplied complete with 5 metres of cable ready to connect.

---

## Technical Specifications

Model	<i>easyVap</i>
Voltage*	230 V
Number of phases	1
Nominal current	6.5 A
Steam output	2 kg/h
Nominal power	1.5 kW
Air flow of fan	57 m <sup>3</sup> /h
Noise level at 1 meter	36 dB (A)
Reserve water tank (canister)	10 l
Dimensions (wxdxh)	540x265x700 mm
Weight (empty)	26 kg

\* Standard 200–240 V, 50/60 Hz

---

## Guarantee:

NORDMANN gives a two year warranty on design and materials (parts subject to normal wear and tear excluded). As part of its policy of continuous improvement, we reserve the right to make technical modifications without prior notice.

All components undergo continuous checks by the manufacturer, thereby guaranteeing the high quality of these humidifiers. The company NORDMANN is certified according to the ISO 9001:2000 standard and its production facilities are regularly inspected by the TÜV Product Service.
